EMIRATES TO INTRODUCE LATEST-GENERATION A350 ON MAURITIUS ROUTE FROM 1 NOVEMBER

News / Airlines

Emirates will introduce its latest-generation Airbus A350 on the Dubai-Mauritius route from 1 November 2026, replacing the Boeing 777 currently operating the carrier's daily EK709/710 service. Configured in a three-class layout, the Emirates A350 will accommodate 298 passengers, including 32 Business Class seats, 28 Premium Economy seats and 238 Economy Class seats.

The deployment further strengthens Emirates' offering to Mauritius, complementing the airline's two additional daily services operated by its flagship Airbus A380. Both A380 flights also feature Emirates' highly regarded Premium Economy cabin, providing travellers with enhanced comfort and choice.

Beyond seamless connections to Dubai, passengers travelling from Mauritius will gain access to Emirates' extensive global network, with onward connections to more than 70 destinations across Europe, Asia and the Americas.

Oomar Ramtoola, Emirates' Manager for the Indian Ocean Islands, commented: "The arrival of the A350 marks another important step in Emirates' continued investment in Mauritius. Our latest-generation A350 will introduce our new Business Class experience to the route, alongside Premium Economy, which is available on a growing list of routes in our network, in addition to a range of new onboard technologies. We are pleased to offer our customers even greater choice and comfort when travelling between Mauritius and Dubai, and onwards across our global network. Together with our two daily A380 services, the deployment of the A350 demonstrates the importance of Mauritius within our network and our commitment to continuously enhancing the travel experience for our customers."

Premium Economy: A Refined Travel Experience

Since its debut, Emirates' Premium Economy has rapidly become one of the airline's most popular travel experiences, offering an elevated level of comfort and refinement. Configured in a spacious 2-3-2 layout, the cabin features cream leather seats, elegant woodgrain accents and a sophisticated design inspired by Emirates' premium-class products. Passengers enjoy a 13.3-inch personal entertainment screen, creating a comfortable and relaxing environment throughout the journey.

Each 19.5-inch seat is designed with generous recline and legroom, complemented by a six-way adjustable headrest, footrest, in-seat charging facilities and a wood-finished side cocktail table. The cabin also provides access to Emirates' award-winning ice inflight entertainment system, offering more than 6,500 channels of content across multiple languages.

The Premium Economy experience begins even before boarding. Guests are welcomed with a complimentary drink and can enjoy seasonal meals served on Royal Doulton china, accompanied by a carefully curated selection of beverages. An exclusive amenity kit, plush blanket and generously sized pillow crafted from sustainable materials further enhance comfort on board.

Additional benefits include priority boarding, dedicated check-in facilities at Dubai International Airport and a generous baggage allowance of up to 35kg, ensuring a seamless and premium travel experience from departure to arrival.

Business Class: Fully Flat seats for a Restful Journey

The Emirates A350 Business Class cabin features a 1-2-1 configuration, offering direct aisle access and a spacious, private environment for both work and relaxation. The fully flat seat is upholstered in cream leather and equipped with a 20-inch 4K Ultra HD screen, a personal mini-bar, and wireless charging. Passengers can enjoy multi-course dining, paired with a curated selection of beverages, and complimentary Bulgari amenity kits and exclusive comfort essentials. A dedicated snack display area at the rear of the cabin also allows guests to help themselves to refreshments throughout the flight.

Economy Class: Comfort Throughout the Journey

Designed with comfort in mind, the cabin features adjustable leather headrests, generous legroom and a 13.3-inch 4K HD touchscreen running Emirates' upgraded ice inflight entertainment system, with Bluetooth connectivity and charging points for personal devices. Customers can book flights through Emirates.com, the Emirates Travel Store at Docks 2, Caudan, or their preferred travel agent.
