OKAY AIRWAYS IOSA CERTIFIED

News / Airlines

Tianjin-based Okay Airways (BK) has recently been certified with an International Air Transport Association (IATA)'s Operational Safety Audit (IOSA) certificate after successfully passing the program on Nov. 18.

The IOSA certification audit is an internationally recognized and accepted evaluation system designed to assess the operational management and control systems of an airline. IOSA uses internationally recognized audit principles and is designed to conduct audits in a standardized and consistent manner.

Airlines are re-evaluated every two years.

The IOSA certificate marks that the Tianjin-based privately-owned carrier has established advanced safety operational management and quality control systems, which plays a significant role in further expanding Okay Airway's international market in the future.
