RIYADH AIR MAJOR MILESTONE IN DELIVERY PHASES OF ITS FIRST AIRCRAFT FROM BOEING BY COMPLETING FIRST TEST FLIGHT

News / Airlines

Riyadh Air has achieved a significant milestone as its first Boeing 787-9 Dreamliner successfully completed its initial test flight (B1 Flight) today. The aircraft took off from Boeing's facility in Charleston, South Carolina, USA, marking the start of a comprehensive test flight program to be conducted within the United States.

The flight was operated by Boeing's test pilots as part of the manufacturer-led standard certification procedures. Upon completion of the full test program and receipt of the required certifications, the process will move to the next phase, during which Riyadh Air's pilots will conduct further tests, followed by the official delivery of the aircraft to Riyadh Air.
