

BOMBARDIER DELIVERS FIRST CHALLENGER 650 AIRCRAFT TO BE OPERATED FROM GERMANY

News / Business aviation, Manufacturer

The *Challenger 650* aircraft is the market's best value proposition for customers in Europe seeking higher baseline equipment level offered as standard, the widest cabin and seats, and the lowest direct operating costs*

Bombardier Business Aircraft announced today that it delivered its first *Challenger 650* aircraft to be operated from Germany. This aircraft joins the Bombardier business jet fleet

in Europe comprised of more than 430 aircraft in service.

"This first German customer delivery of a Bombardier *Challenger 650* jet confirms the aircraft's leadership in Western Europe," said Christophe Degoumois, Vice President, Sales, Europe, Russia and CIS, Bombardier Business Aircraft. "The *Challenger* aircraft series, and the *Challenger 650* jet in particular, are leaders in their category in Europe, with a market share of over 40 per cent. With the Synthetic Vision System (SVS) offered as baseline, its cabin almost six inches wider than the closest competitor, as well as the latest entertainment and productivity solutions, the *Challenger 650* aircraft is the right choice for customers seeking uncompromised performance."

The Bombardier Business Aircraft Market Forecast, published in May 2016, predicts business aviation industry deliveries of 1,530 aircraft in Europe for the 10-year period covering 2016-2025.

In service since 2015, the *Challenger 650* jet builds on the legacy of the Bombardier *Challenger* aircraft series, which set the business aviation standard for reliability, efficiency and productivity for time-pressed executives and VIPs for over 30 years. Featuring a completely new and innovative cabin redesign, the *Bombardier Vision* flight deck technology and optimized engine thrust, the *Challenger 650* aircraft delivers the industry's best overall value, proven reliability and efficiency.
