JET AVIATION RECEIVED IS-BAH STAGE II SAFETY REGISTRATION CERTIFICATES FOR THE NETHERLANDS

News / Business aviation

Jet Aviation has received IS-BAH Stage II Safety Registration for its Amsterdam and Rotterdam FBOs in The Netherlands. The company currently operates 27 IS-BAH-registered FBOs around the world. It expects to gain further IS-BAH certifications in the coming months.

“Along with our commitment to safety and quality, these new IS-BAH certificates clearly demonstrate that challenges are also opportunities to shine,” said Edwin Niemöller, Jet Aviation’s senior director of FBO Operations in The Netherlands. “I couldn’t be prouder of our teams for their agility, professionalism, and unwavering adherence to the highest standards, particularly during these extraordinary times.

“It’s the experience, dedication and passion of our handling teams that enables them to deliver incomparable service to our customers. We work to get the aircraft serviced for safe, timely departures — every time, and continue to focus on our safety performance and sustainability goals,” said Niemöller.
