MOOVE LAUNCHES THE FIRST CO-OWNERSHIP PROGRAMME ON DAHER TBM 960

News / Business aviation, Events / Festivals

The French marketplace offers a new programme dedicated to professionals on the brand new Daher TBM model. With a competitive cost per kilometer, this new offer enables companies to travel efficiently around Europe. Moove has built an offer leveraging the model of shared ownership and drastically reduce the global cost of operations. The offer specifically targets SMBs located in regions poorly served by current business aviation options.

The first taylor-made on demand aviation program for SMBs' top management & their teams

The founder & CEO of Moove, Arthur Ingles, stated "Our goal is to ease the access to the business aviation for professionals. Therefore, we offer a relevant service to our customers especially in remote regions, through an optimized cost for acquisition and utilization that widens current market segments"

Moove ensures the sales & management while selected operators oversee the aircraft operations. The aircraft manufacturer will handle the maintenance of the fleet which benefits from the Total Care Maintenance programme.

By adopting a local installation strategy, in opposition to current market options, Moove allows to cut the hidden costs of repositioning, both economic and environmental. The startup ensures local economic benefits for regional airport operators.

43k € per year all-included for 20 flight hours on the fastest & most efficient single-engine turboprop of the market.

Thanks to the acquisition of an aircraft share, each customer will benefit from a state-of-the-art aircraft in terms of comfort and performance as well as enjoying all the advantages of on-demand aviation.

Shares start with 1/16th of the aircraft for a budget of 280k € and will give access to a 20-flight hours credit at the most accessible market conditions.

By choosing the latest TBM generation, Moove selected a highly digitalized aircraft with unique performance to address the large potential of top and middle management market.

“With the TBM 960, we can fly direct routes in great comfort for professionals more acquainted to long road travels. Its top speed and new cabin make it a perfect workspace, with safety features and an operational framework, guaranteeing the mandatory safety level to our clients.” says Arthur Ingles

A digital management to simplify the operations.

Thanks to a digital tracking, the operations will be performed very efficiently. Co-owners will be able to plan their flights aware of all the benefits and costs modeled by Moove’s unique technology of real time multi-modal benchmark.

The Daher TBM 960, with emissions halved compared to its nearest jet competitors, will benefits from a specific compensation program, based on a door-to-door analysis featured on the application.

This new global offer, for the frequent flyers, completes the chartering & management app-based services already accessible through the marketplace webapp.
