SATCOM DIRECT ACQUIRES AIRCRAFTLOGS, A PROVIDER OF AVIATION DATA MANAGEMENT SOLUTIONS

News / Business aviation, Finance

Global aeronautical communications provider, Satcom Direct (SD), announced it has acquired AircraftLogs (“Stewart-Ratliff Aviation Services, Inc”), a company based in Columbus, OH, that offers the latest technology in aircraft flight scheduling software and tax reporting tools for corporate and private flight departments. With the purchase of AircraftLogs, SD adds scheduling and tax capabilities to its Integrated Flight Operations Management portfolio.

Founded in 2005, AircraftLogs provides web-based aviation data management solutions for corporate and private aircraft. It has become a market leader for scheduling software with the release of a web-based solution that incorporates a user-friendly dashboard and high level of customization to address specific customer requirements. AircraftLogs also has industryleading financial and tax reporting, which simplifies IRS and SEC reporting. Across the industry, flight departments and their IT organizations have been selecting AircraftLogs as their platform for the future.

“Customers spoke and we listened. The addition of AircraftLogs to the SD family enables SD to provide an integrated flight department offering with enhanced capabilities, advanced technology and an unmatched level of expertise to revolutionize the aviation industry,” said Jim Jensen, Founder and CEO of SD. “The flight starts with the schedule and ends with tax reporting. AircraftLogs gives SD, and our SD Pro management platform, a total solution that corporate flight departments have been asking for, allowing them to always be in sync with their aircraft.”

SD Pro, which launched in March 2016, was designed to compile the critical information every flight department needs and display it in real time. Every individual user has a dashboard which is customized to their role potentially giving them access to communications systems status, flight tracking, flight logs, aircraft status and intent, maintenance data, and scheduling data. The acquisition of AircraftLogs will add key features and functionality to the SD Pro platform including a rich suite of scheduling and tax reporting services, providing the aviation industry a complete flight operations management solution.

“We are thrilled to be joining the SD family. SD leads the aviation communications industry and with the addition of AircraftLogs to the SD family we can provide the best solutions of any company in our industry.”, said Doug Stewart, President of AircraftLogs.
