SATCOM DIRECT AT JETEXPO 2016

News / Business aviation, Events / Festivals

This year's Jet Expo, Satcom Direct will be marking three years of operations in Russia and the CIS countries by introducing SD Pro, its new flight operations management platform, to the region's business aviation professionals. In addition SD will be showcasing the sector's first automated flight logs solution, SD Flight Logs, which is an integral part of the SD Pro platform. Delegates will also find out more about the company's latest hardware addition, the SD WiFi Hub, which can complement existing SDR installations on mid and large sized jets, as well as provide a range of services as a standalone solution.

Russia and the CIS markets have embraced the company's hardware platform, and demand for the Satcom Direct Router (SDR) and its associated services like GlobalVT, the in-flight voice and text solution, continues to increase. Potential clients will be able to learn about the benefits of the latest communications technologies and satellite networks, such Inmarsat Ka-Band Jet ConneX, for which SD is one of the leading providers.
