3rdCivil Aircraft Operation Support Technology International Forum was successfully held in Tianjin

With the support of national strategies and industrial policies, China civil aviation industry has developed rapidly. The domestic ARJ aircraft is put into commercial operation, and C919 aircraft will be delivered to users in the near future. The number of civil aircraft fleets is also increasing. It is predicted that China will become the world's largest aviation market by 2020. Undoubtedly it brings new opportunities for the development of the civil aviation market. But at the same time, it faces huge challenges. How to develop aviation maintenance levels and effective supply management has become key elements of ensuring aviation operations.

Under this background, the 3rd Civil Aircraft Operation Support Technology International Forum 2019 was successfully held in Tianjin from June 12th to 13th. It was hosted by Shanghai Society of Aeronautics and Astronautics, Civil Aircraft Operation Support Technology Sub-committee of CSAA; Supported by Air China Limited, China Southern Airlines Company Limited, Hainan Airlines Holding Co., Ltd, Eastern Airlines Technic Co., Ltd, Chengdu Airlines Co., Ltd, China Aviation Supplies Holding Company; Organized by
