ALSIM PROVIDES CIRRUS WITH THE NEW SR SERIES G7 SIMULATOR

News / Maintenance / Trainings, Manufacturer

ALSIM delivered new Cirrus SR Series G7 simulator which serves as a replica of the Cirrus SR Series G7 aircraft for advanced flight training. This new addition caters to the training needs of Cirrus pilots at Cirrus Training Centers. ALSIM ALSR G7 is a replica of the Cirrus SR Series G7 SR22 aircraft, offering a robust and reliable training solution for various pilot licenses, as well as Cirrus aircraft familiarization training.

The simulator features the latest G7-specific interior cockpit and flight deck, including Cirrus Perspective Touch+ avionics system. It operates real Garmin GDU 1450W 12'', GTC585, and GFC700 Autopilot for a seamless transition to the real aircraft. Additionally, the ALSR is equipped with a Garmin GMA 350C – All digital Audio Panel and can simulate the Cirrus Airframe Parachute System. A compact version also exists with TV screens, gathering all essential features in a small form-factor solution.

Jean-Paul Monnin, President of ALSIM Co-founder, commented: "We are thrilled to continue working with Cirrus, delivering cutting-edge flight simulators that elevate pilot training for Cirrus pilots and Cirrus Training Centers. Recently, two new ALSR G7 FTD simulators were delivered

and installed at the Vision Center in Knoxville, Tennessee, with four additional ALSR G7 Compact simulators set to be delivered shortly.”

Zean Nielsen, Chief Executive Officer of Cirrus stated: "The recent addition of the ALSIM SR Series G7 simulator at the Vision Center further enhances our training capabilities, reinforcing Cirrus’ commitment to improving pilot safety through comprehensive flight training. This simulator offers a new layer of immersive training experiences to our flight training portfolio. From our early partnership with Microsoft Flight Simulator to the growth of our interactive Cirrus Approach Private Pilot Program, and the expansion of the Vision Center to include two FAA-approved full-motion simulators for the Vision Jet—making it the only place in the world where you can earn your Vision Jet type certification in a simulator—Cirrus continues to invest in strategic initiatives that advance pilot education and safety."
