EMBRAER APPOINTS FL TECHNICS AS AUTHORIZED E-JET SERVICE CENTER IN LITHUANIA

News / Maintenance / Trainings, Manufacturer

Embraer has appointed FL Technics as an Embraer Authorized Service Center (EASC) for its commercial aircraft fleet in Lithuania. The designation covers the E170 and E190 aircraft, further strengthening FL Technics' regional aircraft maintenance capabilities. Support services will be delivered from the company's facilities in Vilnius and Kaunas.

Drawing on extensive experience in narrowbody aircraft maintenance, FL Technics combines technical expertise, established operational processes and advanced engineering capabilities to provide Embraer operators across Europe with enhanced efficiency, reduced turnaround times and tailored maintenance solutions. The partnership reinforces both companies' commitment to delivering high-quality support and operational reliability for E-Jet customers throughout the region.

Frank Stevens, Vice President of Global MRO Centers of Embraer Services & Support commented: "We are pleased to welcome FL Technics to Embraer's global network of Authorized Service Centers. Their proven maintenance capabilities and growing presence across Europe will

provide E-Jet operators with greater access to high-quality support solutions. This partnership reinforces our commitment to delivering the best customer experience and ensuring our customers can operate with confidence wherever they fly.”

Saulius Bajarunas, CEO of FL Technics stated: “We are honored to become an Embraer Authorized Service Center. This recognition is a strong validation of our technical capabilities, quality standards, and customer-focused service model. We look forward to supporting Embraer operators with reliable and efficient MRO services from our global network."

This latest milestone further reinforces the growing partnership between Embraer and FL Technics. Since introducing Line Maintenance services for Embraer aircraft in 2023, FL Technics has established a strong operational presence across Europe, providing comprehensive support at key locations including Vilnius (VNO), Palanga (PLQ), Bergen (BGO), Oslo (OSL), Trondheim (TRD), Bucharest (OTP), Cluj-Napoca (CLJ), Bodø (BOO), and Ålesund (AES).

The expanded authorization builds on this successful collaboration, reflecting FL Technics’ continued investment in Embraer aircraft support and its commitment to delivering reliable, high-quality maintenance services throughout the European region.
