EPIC FLIGHT ACADEMY AGREES TO PURCHASE UP TO 50 PIPISTREL VOYAGER AIRCRAFT, SUPPLEMENTING ITS FLEET OF TRAINERS

News / Events / Festivals, Maintenance / Trainings, Manufacturer

Epic Flight Academy is the launch customer for the Pipistrel Voyager. The company has signed a purchase agreement for up to 50 Voyager aircraft, with an order for 10 initial deliveries beginning in 2027, and options for up to 20 additional aircraft in 2028 and 20 in 2029, supporting the continued expansion of its training fleet and growing demand for pilot training.

Chris Crow, vice president, Piston & Utility aircraft sales commented: “The Pipistrel Voyager is an ideal fit for Epic Flight Academy, building on its established fleet of Cessna Skyhawk aircraft with a platform that further expands training capability and flexibility. The Voyager seamlessly supplements the Academy’s Cessna piston fleet with an efficient, purpose-built training platform that helps increase capacity, supports consistent progression from basic through advanced training, and maximizes utilization across their core instructor-student missions.”

Danny Perna, Epic Flight Academy founder and CEO stated: “At Epic Flight Academy, we evaluate every aircraft through a simple question: Does it make our students safer, our training more effective and our operation more efficient? The Pipistrel Voyager checks all three boxes. It complements our Cessna fleet by providing a modern, purpose-built training platform that expands capacity, lowers operating costs, and supports the next generation of professional pilots. We're excited to partner with Pipistrel as the launch customer and help shape the future of flight training.”

As flight schools look for practical, scalable solutions, the Pipistrel Voyager reflects the company’s dedication to developing forward-looking platforms for the next generation of pilots—backed by Textron Aviation’s ability to design and deliver the best aviation experience with the industry’s most versatile product portfolio.With a streamlined design and low direct operating costs, the Voyager offers a scalable solution for flight schools seeking to modernize fleets. The aircraft builds on Pipistrel’s proven approach to efficient training platforms while introducing enhanced capability and flexibility for a wide range of missions.

Epic Flight Academy is a Florida-based flight training provider offering FAA Part 141 and Part 61 pilot training across multiple U.S. locations. With a flight training fleet of 70 aircraft including Cessna Skyhawks, Epic continues to invest in training platforms that support pilot development.

The Voyager is a next-generation training aircraft designed to support the evolving needs of flight schools and pilot training programs worldwide. It has been purpose-built to align with emerging Modernization of Special Airworthiness Certification (MOSAIC) regulations, expanding both aircraft capability and pilot training opportunities.

Pipistrel Voyager is a next-generation training aircraft purpose-built for evolving pilot training requirements. Designed to align with anticipated MOSAIC regulations, the two-seat aircraft expands capability for flight schools while maintaining the efficiency and simplicity operators expect from Pipistrel. The Voyager supports day and night IFR training, intentional spin certification and beginner-to-advanced pilot progression.

Equipped with Garmin AXIS avionics, a three-axis autopilot system and an integral ballistic parachute system, the aircraft provides modern training capability with enhanced situational awareness and an additional layer of safety. With an expected 740-nautical-mile range, a Rotax 912 ULS engine and a purpose-built instructor-student configuration, the Voyager helps flight schools maximize aircraft utilization, support extended training missions and increase training output while maintaining a low operating cost profile.
