LUFTHANSA TECHNIK TURBINE SHANNON EXPANDS ITS OPERATIONS

News / Maintenance / Trainings

Irish Lufthansa Technik Turbine Shannon is expanding its business and facility in response to growing market demand. With a new building in Shannon's Free Zone covering 2,000 square meters and equipped with state-of-the-art technology, the company is increasing its capacity. It will offer new products for CFM56 and V2500 turbine engines powering Boeing 737 and Airbus A320 aircraft . Operations are set to commence in the new facility in the first quarter of 2023, offering new highly skilled jobs to the mid-west region of Ireland.

Michael Malewski, CEO and Managing Director of LTTS commented: "This is a very special milestone for Lufthansa Technik Turbine Shannon that is celebrating its 30 years in operations in Ireland. We are delighted to add a manufacturing operation to the Shannon Aviation Services Cluster. The region has been home to Lufthansa Technik MRO activities since the 1990's and it's great to contribute to its expansion. With this commitment into a promising business segment we aim at enhancing value for our growing list of customers."

After experiencing a sharp fall of activity during the Covid-19 crisis, LTTS has already created in excess of 100 jobs. The expansion will enable the company to grow in products for which there is strong demand in the foreseeable future.
