MID-EAST ACADEMY FOR AVIATION SCIENCES ENHANCES PILOT TRAINING WITH A NEW ALSIM AL250 SIMULATOR

News / Maintenance / Trainings

Mid-East Academy for Aviation Sciences has added an AL250 simulator to its training fleet. This addition reinforces the academy's reputation as a leader in aviation training in the Middle East, offering students access to advanced flight simulation technology. AL250 simulator addresses the initial phase of training needs (PPL, CPL, IR/ME) and is a SEP/MEP reconfigurable simulator certified as an EASA FNPT II. In addition, it offers both classic and glass cockpits for each flight model at the simple flick of a switch. This device has been extremely well received since its creation, and more than 100 units have been installed and are operating successfully worldwide.

Mohammad ABUSEINI, FSTD Manager at Mid-East Academy commented: "As we have been offering our pilot students very high-quality training, and to benefit from the most advanced training technology as they prepare for their future careers, we have selected the AL250 simulator from ALSIM Flight Training Solutions because of its high quality and stable functionality, the fact that it matches any other product on the market and being a fully capable training simulator for PPL, CPL & IR/ME, will eliminate the need for multiple devices at our Academy. We have been ALSIM customers for over 24 years, they are experts in flight training solutions, plus their extensive experience in flight simulation perfectly aligns with our goals and plans."

Leonardo Rodrigues, Sales Manager at ALSIM, stated: "Mid-East first chose an ALSIM simulator back in 2001, and we're truly grateful that they continue to place their trust in us with this new

acquisition. Their commitment to providing pilots with the latest technology reflects a shared dedication to quality and longevity, ensuring their simulators remain reliable and ready for continued certification.”

The Mid-East Academy for Aviation Sciences, based in Jordan, has specialized in training pilots and aircraft maintenance technicians for over 25 years. Accredited by the Jordanian Civil Aviation Regulatory Commission and EASA, the academy delivers programs aligned with the highest international standards. Its curricula, inspired by leading European training systems, ensure students benefit from the latest methods used worldwide.
