SCHOOL4PILOTS IN GERMANY ACQUIRED AN ALSIM ALSR20 SIMULATOR

News / Events / Festivals, Maintenance / Trainings

ALSIM is strengthening its presence in Germany as School4Pilots GmbH, based in Hannover, Germany, has acquired an ALSIM ALSR20 simulator. The ALSR20 is the brand-new simulator manufactured by ALSIM and is the exact replica of the Cirrus SR20 aircraft. This Flight Training Device (FTD) Level 5 is specifically designed for PPL and IR training needs. The device reproduces the Cirrus SR20 specific interior cockpit and flight deck and comes along with a Garmin GDU 1050A and GFC 700 Autopilot. The ALSR20 is equipped with a Garmin® GMA 350C® – All digital Audio Panel and a Garmin® GCU 479®. The device can also simulate the Cirrus Airframe Parachute System® (CAPS®).

Ulf Meckbach, CEO at School4Pilots GmbH, declared: “As one of the youngest flight schools, School4Pilots GmbH was founded at Hanover Airport in Germany in 2021. Since then, we have strived to offer our customers the best service and to fulfill their dream of flying with the most modern aircraft. This includes, that we in particular train exclusively on glass cockpits and only work with professional and experienced flight instructors at an international commercial airport. As commercial and airline pilots, we know that the goal of

good training to become a safe pilot can be best supported and achieved more quickly by using a professional flight simulator.

After we decided to include a brand-new Cirrus SR20 G6 as a charter and IFR training aircraft, it quickly became clear that we wanted to use the ALSIM ALSR20 simulator as an addition to our aircraft fleet. The combined use of a real aircraft and the identical EASA-certified simulator (ALSR20) ensures that customers can train in any situation under realistic conditions, regardless of the weather.

The management of School4Pilots GmbH is so convinced of the simulator that a separate simulator building is being built for it. School4Pilots customers are already looking forward to being able to complete the first flight lessons on the youngest member of the fleet in 2022."

Nicolas De Lassus, Sales Account Manager at ALSIM, adds: "It's been a great pleasure to collaborate with the School4Pilots GmbH team for the last couple of months. We hope that it's the beginning of a long and successful cooperation between our two companies."

The dream of "self-flying" is more realistic than you think. With the "Approved School4Pilots Step-Up-Program" we bring you into the cockpit of your choice. As a customer of the School4Pilots GmbH, you can be sure that the goal is not just to acquire a license, but also to train good and safe pilots. Our concept not only trains you, but coaches you to convey the necessary and prescribed training content individually and according to your previous knowledge and to achieve YOUR goal.
