TAHITI BASED PILOT TRAINING CENTER ,C3P, TRUSTS IN ALSIM AGAIN AND BUYS AN ALX FLIGHT SIMULATOR

News / Maintenance / Trainings

C3P, Polynesian Center of Piloting Improvement, located in the heart of the South Pacific in Tahiti, has been using an Alsim simulator since 2012. As part of the introduction of their new professional pilot training course, C3P signed a new contract with Alsim for a full-option FNPT II MCC ALX. This new device will cross the oceans and be delivered within the first half of 2019.

Mr Stéphane Chantre, C3P's Manager, explained why they kept trust in Alsim again: "We needed a high performing device to add to our current fleet. It had to cover the whole ab-initio training, from first hours up to multi-crew coordination training. We have been working with Alsim already for many years now and we appreciate their efficiency. It was therefore natural for us to contact them to provide us with the appropriate tool."

Mrs Audrey Jeffroy, Alsim Sales Director, adds, "C3P has been our client for the last 6 years and we are proud to support them in their expansion process. This is a great installation in perspective for Tahiti!"

About C3P

Since the creation of the center in 2006, 20,000 flight hours have been performed at C3P. The school, based in Tahiti, helps an increasing number of aviation enthusiasts to realise their childhood dream, flying!

C3P quickly became the main pilot training school in French Polynesia, thanks to the rigorous maintenance of its fleet, its instructor's skills and a dynamic investment policy. A training center of reference accessible to all, renowned for its reliability and its instruction quality, C3P obtained its ATO agreement (FR.ATO.0055) in December 2013, confirming the school's compliance with European standards.

With a complete single and multi-engine fleet available for its clients 365 days a year, C3P helps private and professional pilots benefit from the greatest flight opportunities that the Polynesian islands have to offer. Their aircraft are also maintained by a PART MF authorised maintenance center, a guarantee of their quality control.
