VIETJET AND AIRBUS TO ESTABLISH A320 FLIGHT & MAINTENANCE TRAINING SERVICES IN HO CHI MINH

News / Maintenance / Trainings, Manufacturer

Airbus has signed an agreement to provide flight and maintenance training services to Vietjet in Ho Chi Minh City. With this agreement, Vietjet's flight training centre will host an Airbus A320 Full-Flight Simulator (FFS) to conduct flight crew training for its A320 family fleet.

In addition, the agreement provides Maintenance training services via the Airbus training media and courseware including its dynamic trainers and teaching techniques. These will be delivered within the Airbus Competence Training (ACT*) classroom concept, whilst bringing Airbus' and EASA's standards to the Vietjet Training Organization.

Dinh Viet Phuong, Vice President of Vietjet says: "Vietjet and Airbus have effectively collaborated with each other and this agreement once again marks a new milestone for both organizations. Airbus's training expertise will help enforce Vietjet's capabilities in flight and maintenance training

to be in line with the internationally recognized standards. Investment in an aviation institute is one of the most important goals in Viejtet's sustainable growth strategies."

Didier Lux, Head of Airbus Customer Services says: "We are delighted to expand our services footprint in Vietnam with our first training services agreement in the country. Teaming-up with Vietjet is a major milestone to deliver Training by Airbus in the region, and it ensures more efficient service, support and proximity to our customers."

Airbus produces the world's most modern and comprehensive family of airliners, ranging in capacity from 100 to more than 500 seats and has sold over 16,300 aircraft to more than 380 customers. Furthermore, through "Services by Airbus", Airbus offers end-to-end fleet lifecycle solutions for all its customers. The portfolio ranges from standalone services, to the most complete integrated solutions. These include: Flight Hour Services and Tailored Support packages, upgrades, training, e-solutions, engineering & maintenance, flight operations air traffic management, and material management services.
