AIRBUS HELICOPTERS SIGNS FIRST HCARE SMART CONTRACT IN BRAZIL

News / Manufacturer

This first contract of the Smart line of HCare shows the potential of the Brazilian market for these services in light and medium aircraft.

HCare Smart offers maintenance services with payment per flight hour, allowing greater budget control by the customer, and optimized spare parts availability via direct access to Airbus Helicopters' worldwide stock.

"We chose the HCare Smart program to better control our expenses and to improve aircraft availability, with the goal of improving our overall performance as an aviation company. Given our current experience with Safran's engine hours program, we are sure that the result will be greater financial control, better AOG service and better planning, "explains Álvaro Stamato, the company's chief pilot.

HCare Smart solutions are well suited to meet the needs of local customers for scheduled and non-programmed maintenance on aircraft parts and components.
