AURA AERO EXHIBITS AT AERO FRIEDRICHSHAFEN

News / Events / Festivals, Manufacturer

AURA AERO will be at AERO Friedrichshafen show to present INTEGRAL R, a twin-seater training aircraft, with an aerobatics capacity. The INTEGRAL R showcased has a taildragger landing gear and a thermal engine (210 hp). With a flying range of over 800 km, it is equipped with a spacious and ergonomic cockpit in order to simplify operations for pilots and instructors.

Like all the aircraft in the AURA AERO family, INTEGRAL R was designed anticipating its environmental impact during flight as well as its end-of-life recyclability, being manufactured with a unique wood-carbon composite that ensures lightness, resistance and easy operational implementation.

INTEGRAL R is part of the INTEGRAL series, also available in two other versions:

- INTEGRAL S, for training, with a 180 hp thermal engine, tricycle landing gear

- INTEGRAL E, with electric propulsion.
With our co-founders, Je?re?my Caussade and Wilfried Dufaud, and our commercial teams led by Gwenola

Robert, we will welcome you on our stand A4-221.

During the show, we will propose four mini-conferences where we will present our aircraft, their specifications and our innovative approach, to share with you our passion for flight.
