BOMBARDIER SIGNS LETTER OF INTENT WITH HK BELLAWINGS JET LIMITED FOR UP TO 18 GLOBAL 6500 AND GLOBAL 7500 AIRCRAFT

News / Business aviation, Manufacturer

- **Newest additions to the *Global* family demonstrating overwhelmingly positive response from customers and business aircraft industry**
- ***Global 6500* and *Global 7500* aircraft are perfectly suited for operations in Asia, offering global reach to key cities around the world**
- **New aircraft join HK Bellawings Jet Limited's existing fleet of *Challenger* and *Global* business aircraft**

Bombardier announced that it has signed a letter of intent (LOI) for up to 18 *Global 6500* and *Global 7500*business jets with HK Bellawings Jet Limited, a leading aircraft management company based in Hong Kong. If all firm orders and options are exercised, the transaction would be valued at approximately $1.14 billion U.S. based on 2018 list prices.

“We’re thrilled with the tremendous response we have received since launching our newest *Global* aircraft just days ago,” said Peter Likoray, Senior Vice President, Worldwide Sales and Marketing, Bombardier Business Aircraft. “Our leading *Global* aircraft will contribute to the continued success of HK Bellawings Jet Limited and its operations in the region.”

“We are glad to announce our letter of intent to purchase 18 *Global 6500* and *Global 7500* on the first day of EBACE. Global*6500* and *Global 7500* are the top-of-the-range aircraft from Bombardier’s latest generation. The two models align with HK Bellawings’ rapid development to be a one-stop business aviation solution, empowering us to reach higher and further in the long run,” HK Bellawings’ President Mr. Zhang Yijia said.

The recently launched *Global 6500* jet and the renamed *Global 7500* aircraft set the standard with the longest range and the largest cabins in their respective classes—all while offering Bombardier’s signature smooth ride.

The *Global 6500* aircraft joins the high-performing *Global* aircraft family, offering additional range and speed, as well as highly favorable operating costs versus smaller competing aircraft with less range. The *Global 6500* can connect Hong Kong or Singapore with London.

The *Global 7500* aircraft now has an unmatched range of 7,700 nautical miles, a full 300 nautical miles further than initial commitments. It is the only business aircraft that can connect New York to Hong Kong, and Singapore to San Francisco, nonstop.

Based in Hong Kong, HK Bellawings Jet Limited is a distinguished business jet management company dedicated to providing a diverse array of professional, highly efficient and comprehensive business aviation services and solutions, which include business jet management, aircraft maintenance, travel concierge service, aircraft acquisition service, and business aviation consultancy. They operate a fleet of *Challenger* and *Global* business aircraft.
