DISCOVER CIRRUS AIRCRAFT G2+ VISION JET - ENHANCED TAKE-OFF AND INFLIGHT WIFI

News / Business aviation, Manufacturer

Cirrus Aircraft unveiled a re-imagined Vision Jet™–the G2+ Vision Jet –featuring optimized engine performance for expanded mission capabilities, Gogo® InFlight WiFi for a connected cabin experience, and bold, new colorways for added ramp presence. The G2+ Vision Jet is the latest demonstration of the company's dedication to relentless innovation, and joins a host of industry-leading technologies offered in the best-selling jet in general aviation, including Autothrottle, Safe Return™ Emergency Autoland and the Perspective Touch+™ by Garmin® flight deck.

"The G2+ Vision Jet is the next step in continuing to transform personal aviation," said Zean Nielsen, CEO at Cirrus Aircraft. "The enhancements to both the take-off performance capabilities in hot and high conditions and the InFlight WiFi connected passenger experience ensure that the Vision Jet continues to exceed the evolving needs of our owners, both present and future. This aircraft is one more revolutionary advance in personal aviation, made possible by the world-class team at Cirrus Aircraft."

Optimized Performance for Expanded Possibilities

The Vision Jet is known as a versatile single-engine jet capable of adapting to the unique needs of business and personal travel missions. With the G2+ Vision Jet, the Williams FJ33-5A engine has been finely tuned with a newly optimized thrust profile that provides up to 20%

increasedperformance during take-off. The optimized performance joins the expanded flight envelope to FL310, launched with the G2 Vision Jet in 2019, offering enhanced performance to increase range, carry more and enjoy added reassurance in hot temperatures and high elevations –providing access to additional airports at popular destinations across the globe.

Connected Cabin Experience with Gogo InFlight WiFi

Available for the first time on the G2+ Vision Jet, Gogo InFlight WiFiadds industry-leading connectivity while in the air using Gogo's AVANCE L3 system. Elevating the cabin experience, InFlight WiFi keeps the pilot and passengers connected, enhancing productivity and enabling real-time communication with teams and customers on the ground to keep commerce moving at jet speed. The added convenience of USB-C ports keeps devices charged for further productivity.

As an added convenience for owners and operators, the initial Gogo InFlight WiFi subscription can be included in the JetStream ownership program. Designed as a comprehensive program, JetStream goes beyond a standard warranty to provide the added benefits of normal wear replacement, recurrent training, direct support, subscription services and more for a worry-free ownership experience.

Re-Imagined Designs for an Enhanced Ramp Presence

New colorways, including bold additions like Titan Grey, Voltand Bimini Blue, join updated design lines that accentuate the distinct curve of the Vision Jet's carbon fiber fuselage for an unmistakable presence on the ramp, runway or in the air. From the exterior, pilot and passengers step into a remarkably spaciousinterior designed around the largest cabin in its class, featuring premium leather, bolstered seats, noise reduction and an immersive experience made possible by the panoramic windows unique to the Vision Jet.
