EMBRAER ATTENDS AIRSHOW CHINA 2024 WITH A FOCUS ON SUPPLY CHAIN COLLABORATION

News / Events / Festivals, Manufacturer

Embraer will participate in Airshow China 2024 in Zhuhai from November 12 – 14, launching its latest market outlook and with a special focus on collaboration opportunities with the supply chain in China. Over the last 50 years Brazil and China have developed a strong and strategic diplomatic relationship, including key links in the aviation sector. With the aim of deepening collaboration with China's aviation industry, the company will host an 'Embraer Supplier Day' event on Nov. 14.

Martyn Holmes, Chief Commercial Officer, Embraer Commercial Aviation commented: "We're excited to be back at Zhuhai Airshow. Embraer made its debut at the 3rd China Air Show 2000. Since then, we have participated in all 12 editions of the show. We're continually looking for ways to promote cooperation in China by offering aircraft that improve air service and connecting second and third tier cities to satisfy the ever-growing demand for air travel. The airshow is a great platform to meet with our customers, partners and stakeholders across the region."

The Company will also reveal its latest Market Outlook for the Chinese commercial aviation and air freight market at a press conference on Nov. 13 at the Zhuhai Airshow Hall 6, 1400hrs in Room 216. The Outlook will highlight the growing importance of fleet flexibility and small-narrow body aircraft in building connectivity in China. It also contains analysis of the air freight market and cites new opportunities for small-narrowbody freighters resulting from the continued growth of E-commerce and the growing demand for faster and more efficient air-logistics services.

Embraer will also discuss a number of new and significant enhancements to the E-Jets E2 family of aircraft, including the world's first ever automatic takeoff system (E2TS), improved fuel burn, extended range, increased engine time on wing, and cabin optimizations.

Embraer has made good progress in China with both E190-E2 and E195-E2 certified by CAAC. Embraer has also established a comprehensive after-sales service system to support the E-Jets fleet in China, including authorized maintenance centers, spare parts warehouses, and complete pilot training network. Providing a solid foundation for the new generation of E2 family to operate in China.
