FIRST MEDEVAC CONFIGURATION INSTALLATION ON A HONDAJET ELITE

News / Business aviation, Events / Festivals, Manufacturer

The first installation of a medevac configuration on the HondaJet Elite is announced! The medevac configuration was installed on a HondaJet Elite owned by Wing Spirit, an air ambulance and charter company based in Hawaii. A mockup of the HondaJet Elite medevac configuration will be displayed at Honda Aircraft Company's booth at NBAA-BACE.

"We are pleased to announce the installation of the first medevac configuration on the HondaJet. We are confident the aircraft's size, efficiency, speed and cabin comfort are well-suited to these special missions in the Hawaiian Islands," said Honda Aircraft Company president and CEO Michimasa Fujino.

Honda Aircraft Company continues to strengthen its service and support capabilities as it expands its service network around the world. The company announced the addition of a Northeastern United States service center in Wilmington, Delaware. flyADVANCED is an FAA 145 Repair station with airframe, power plant and radio ratings, Garmin Dealer and Service Center and mobile repair capability.

“flyADVANCED is proud to provide HondaJet customers and operators with unsurpassed levels of service in the Northeastern United States. We are confident our team’s level of expertise and experience are tailor-made to support the world’s most technologically advanced light jet,” said Regis de Ramel, president of flyADVANCED.

Additionally, due to increased demand for the HondaJet, Honda Aircraft has begun construction on a second FlightSafety International HondaJet Elite simulator. The company revealed today that the second simulator will be located in Farnborough, Hampshire in the United Kingdom to support HondaJet customers throughout Europe. It is expected to begin operation in April 2020.

When commenting on the addition of a second flight simulator and a new service location, Fujino said, “As our fleet continues to increase in size, it is necessary for the HondaJet service, support and training network to expand. We are proud of the relationships we have with flyADVANCED, FlightSafety International and our support network around the globe. They have been instrumental in providing HondaJet customers with an unrivaled ownership experience.”

Honda is committed to providing future generations with the joy and freedom of mobility in sustainable ways. As the company explores the potential for alternative fuel use in its aircraft, Honda Aircraft Company flew a HondaJet Elite to NBAA-BACE 2019 using sustainable aviation fuel.
