H160’S THIRD PROTOTYPE GETS ITS CARBON DESIGN LIVERY

News / Business aviation, Manufacturer

Signature livery a nod to A350XWB paint scheme

Marignane, France, The third H160 prototype has received a fresh coat of paint and now features a striking “carbon” livery designed as a nod to the Airbus A350 XWB MSN2 flight-test aircraft. Both aircraft are produced using advanced composite materials supplied by Airbus’ long term partner, Hexcel.

The H160 is the first civil helicopter equipped with a full composite fuselage, the advantages of which include a lighter fuel-saving airframe, performance optimization and simplified maintenance.
