STARLINK HIGH-SPEED INTERNET NOW AVAILABLE FOR CESSNA CARAVAN

News / Business aviation, Manufacturer

Textron Aviation announced an additional high-speed internet connectivity solution for the Cessna Citation Caravan following the Federal Aviation Administration's issuance of AeroMech's Supplemental Type Certificate for Starlink high-speed internet connectivity. AeroMech's STC utilizes Starlink's constellation of Low Earth Orbit satellites to provide more reliable connectivity over land, water and remote areas, where traditional in-flight Wi-Fi may not have service.

Brian Rohloff, senior vice president, Customer Support commented: "The Cessna Caravan is so versatile, it can go almost anywhere, and Textron Aviation understands the importance of providing a connectivity solution in more of the places our customers want to go. The Caravan recently celebrated its 40th anniversary and offering Starlink high-speed connectivity upgrade continues to provide customers with the latest technology, no matter where the aircraft is in its lifecycle."

Customers can schedule the upgrade for installation at North American Textron Aviation Service Centers and select International Service Centers. AeroMech's STC utilizes a Starlink Aviation Kit,
